### About Rockmetric

Rockmetric is a 'Cognitive Data Analyst' that automates business monitoring with a simple Google-like 'Natural Language Search' interface. Enterprises can now democratise access to sophisticated insights and ad-hoc data queries without having to expand expensive reporting and analytics teams.

Teams can request for queries in simple English such as "Why did the Sales for Product A dip in London during May?" or "Which are the top Account Managers by Target Achievement Rate".

The platform understands your questions, analyses data and delivers beautiful charts and complex analysis instantly, without any human intervention. Teams can access data across web, mobile, email, voice or other popular communication platforms.
